 - Tailwind CSS
 - BOOTSTRAP
- BACKEND**
 - PYTHON (Django)
 - PhpMyAdmin

DATABASE

- Mysql
- SQLite3

LANGUAGE

- Gujrati
- English
- Hindi

ABOUT ME

I am a motivated and detail-oriented web developer with strong skills in HTML, CSS, JavaScript, and modern web tools. As a fresher, I may not have work experience, but I'm fully committed to learning, growing, and building meaningful, user-friendly websites. I'm eager to contribute to real-world projects and become a valuable part of a professional development team.

2025-NOW

PROJECTS

HEALTHCARE PORTAL - AROGYAM

Discription:

Developed a web-based hospital management system using Python Django to streamline healthcare operations such as patient registration, appointment scheduling, and doctor management. The project features responsive UI design, secure authentication, and efficient database integration for smooth workflow across all user roles.

Key Learnings:

Gained hands-on experience in full-stack development, integrating Django backend with HTML, CSS, Bootstrap, and JavaScript, implementing CRUD operations, and managing MySQL databases. Improved skills in project structuring, UI design, and web security.

Highlights:

- Built with Django Framework & MySQL
- Separate dashboards for Doctors, Patients, and Admin
- Appointment booking and slot management system
- Responsive design following Arogyam theme (#1ABC9C)
- Focused on authentication, validation, and UX optimization
